realdolmen  
Positive digital flow

## Discover the wonderful world of Azure Cloud

Are you an experienced IT professional who wants to explore and overcome the challenges involving the cloud? If so, you may be the perfect candidate for our Expedition Azure training program..

### What's in it for you?

#### Get started now

As an experienced professional, you already have a great deal of valuable Microsoft knowledge. This is our basis for further developing your expertise. During the process, you will have the opportunity to keep using this knowledge in projects within your domain

#### Theory and practice

while significantly expanding on your knowledge of Azure. In two months, you will receive all kinds of training from our own experts. They will reveal the secrets on lift & shift migrations to DevOps, IAC, pipelines, YAML, Kubernetes, PowerShell, etc.

#### Learn on every level

In addition to having ample technological knowledge, our employees' soft skills are very important to us, as evidenced by our training course on the Insights Discovery model.

#### Live your positive digital flow

After finishing your training, you will be ready to embark on a fantastic career at our company with its global mindset and challenging projects. You will be part of a dynamic team and have the opportunity to further shape your career.

"Most companies have now started or are planning to migrate to the cloud. The cloud is an essential component of this post-digital transformation era. Microsoft Azure is often the cloud platform of choice.

Many IT experts are eager to discover the world of Azure. However, this desire is often hampered by the current context in which they work: not enough projects, too little focus on the cloud, insufficient in-house expertise, etc.

Inetum-Realdolmen has been building up expertise and experience from the start of Azure. Thanks to many successful projects and certifications, we are now an established name and reference for virtually all Microsoft solutions. In barely five months, we have won seven Advanced Specializations, making us unique as a local partner in Belgium. In other words, we have no shortage of challenging projects. Our Expedition Azure project focuses on experienced system engineers who want to further develop their expertise, with a focus on Azure. Because of the intensive training courses and interesting projects, I think this is the ideal way to give your career a fresh new twist."

**RIK DELVA,**  
**AZURE SOLUTION MANAGER**

### About Azure

The Azure cloud platform consists of more than 200 products and cloud services designed to help you create new solutions so you can meet today's challenges while preparing for the future. Build, deploy and manage applications in multiple clouds, on premises and on the edge using the tools and frameworks of your choice.

### About Inetum-Realdolmen

In addition to customer and technology centricity, our employees are of the utmost importance to us. We strive to provide the best working experience for our employees so that we are stronger together. To this end, we developed our Employee Centricity policy, focusing on 6 domains. We want to achieve a match between our company DNA and yours. We care about personal growth and commitment. Knowledge is our currency. Communication is the key for us. 'To get there, together' is our motto, and our aim is to create a healthy work/life balance. We always start from solid foundations: the trust and warm family spirit that thrives within our company. #WERFAMILY!

"I had been working as a system administrator at Inetum-Realdolmen for four years when I saw the vacancy for the Azure track. This opportunity to delve deeper into a new technology came at the perfect time for me. I felt like I had a comprehensive understanding of everything in my previous position, so a new challenge was welcome. It was nice to start from scratch together with like-minded people and immerse myself in an all-new world. We also had immediate access to our own environment in Azure to try out and discover everything for ourselves. It is fantastic to see how my experience and knowledge is continuing to grow. I really feel I am making progress. This motivates me every day. There is also enough time and guidance to be able to gradually roll it out to customers. This allows us to safely train in 'real-life' settings. The freedom to decide on which direction I wanted to go within Inetum-Realdolmen was the perfect way to give my career a new direction."

**NICO LENAERTS,**  
AZURE CLOUD ENGINEER
